CUSTOMISING YOUR TEMPLATE IN CANVA

👉 **Change colors:** click on any text box or shape. The menu bar at the top will change, and you should see a color box. Click that, and then you can choose any color you like.

👉 **Change typefaces:** click on any text box. As with the color selector, the top menu will change and show you the font list, colors, and styles. Choose what you prefer.

👉 **Add your brand elements:** shop name, web address, contact information, photo and introduction, invitation to join mailing list, and other information you think is relevant.

👉 **If your template has text** in various places, you can change that text to say whatever you wish. Please note that, if you are reselling the product, we advise rewriting at least part of the text.

👉 **You're ready to export to PDF!** Click the 'share' button in the top left. Find the ‘download’ link. Choose the file type you'd like. We recommend PDF for resale and sharing with your clients.

👉 **On the left-hand Canva menu,** click the 'styles' icon. This brings up font and color combinations. You can try the various combinations until you find something you like.
Click **'apply to all'** to set the color and font style throughout your document. Save
and download as usual.
